69 Years of providing Quality Avionics Mounting Solutions

Avionics Mounts Inc. has designed the majority of avionics mounting devices currently in use today. We have more experience in the design, manufacture, and distribution of ARINC 408A and MS28042 avionics clamps than any other company in the world.

Our company was founded in Marion Indiana in 1943 by Lester Pitcher under the name Marion Screw Products. The products we manufactured when the company was founded were made to support the United State's efforts during World War II.

The first product Avionics Mounts Inc. manufactured was the Tachometer Drive Adapter for the U.S. Air Force pictured below.

In 1972, Archie Johnson purchased the corporation from Les Pitcher's son, David Pitcher. Archie renamed the corporation to MSP Inc. In 2002 Archie sold our old clamp designs to a third party, but retained ownership of the MSP corporation. As part of the sales agreement Archie agreed to change the name of the corporation and accept a five year non-compete clause. The non-compete clause expired in 2007 and Archie has been "back at it" designing our new mounting products under the name Avionics Mounts Inc. We wish to emphasize that we are no longer associated with the MSP trademark, or endorsed by the company that purchased our old designs and trademark.

Our team has designed and manufactured both custom, and standard avionics mounts for every major airframe manufacturer in the United States, and several European aerospace companies. Avionics Mounts Inc. has designed and built parts for every manned space mission since the beginning of the United State's space program. The products we have designed are still in use on most of aircraft flying today. No other company can offer the experience that AMI's management has had in the design and manufacture of avionics mounting solutions.

Most recently Avionics Mounts Inc. has been retooling for our new designs of mounting products so that we can offer our customers a higher quality product at affordable prices.

Avionics Mounts Incorporated's new patented designs (Patent # 7,832,699 B2) are superior to our old designs and can reduce both our customer's, and our own inventory requirements. The new designs also have a much smaller carbon footprint due the elimination of heat treating processes. Those items assure that AMI will continue to be the leader in the design and manufacture of avionics mounting products for years to come.

Our Management Team

C.E.O. / Engineer - Archie L. Johnson

- Employed by Avionics mounts Inc. for 42 years
- •Owner/Operator of Avionics Mounts Inc. for 37 years.
- •Designed the majority of instrument mounts in use today.
- •Designed the machinery and tooling for production of various instrument mounting components and avionics housings.
- •Has designed instrument mounts and other parts that have been used on every manned space flight.

Office Manager / Inside Sales - Denise Taggart

- Employed by Avionics Mounts Inc. for over 28 years.
- •Extensive knowledge of our customer base and their needs.
- •Extensive knowledge of our products and their applications.

Quality Manager - Dean Johnson

- Employed by Avionics Mounts Inc. for 35 years.
- •Involved in the design of avionics mounts and housings for over 25 years.
- •Certified Cisco Network Administrator.
- •Extensive knowledge of aerospace quality systems and requirements.
